

Material Lifts

Do you need a reliable material handling system to move cargo vertically between floors? A Matot Material Lift is your sustainable solution!

STANDARD FEATURES

- Lift distance up to 50 feet
- Standard speed 40 feet/minute
- Floor level loading
- Two loading configurations – single side or opposite sides
- Equally suited for light or heavy loads
- Appropriate for occasional duty or continuous duty
- Elevator type precision guide rails
- Manually operated vertical bi-parting, slide up and swing type UL fire rated entrances
- Architectural grade stainless steel or primed finishes
- Commercial grade construction throughout
- Performance proven drive systems to match your application requirements
- UL approved microprocessor control systems
- Equipment manufactured to meet or exceed the requirements of ANSI A17.1 / CSA B44 as a material lift.
- Low cost installation
- Minimum maintenance requirements

MATERIAL LIFTS

Features	Benefits
Uses less energy than a passenger elevator	Cost savings!
Takes less space than a passenger elevator	More building space available for other uses
Custom-built for your needs	Cost and efficiency savings when planning a project
Loads up to 2,500 lbs.	Custom-designed for medium to heavy duty projects
Easier to keep hazardous cargo or contaminated material separated (especially important for hospital or laboratory uses)	Keeps people safe

“A Matot Material Lift or Dumbwaiter is one of the few things you can add to your building that will make money over time through efficiency savings – it will pay for itself over two years!”

Matot Dumbwaiters and Lift Solutions is the premier commercial dumbwaiter manufacturer in the USA. Our dedicated and knowledgeable sales team can be reached at sales@matot.com.
