

MATOT

DUMBWAITERS & MATERIAL LIFT SOLUTIONS

WHY CHOOSE MATOT DUMBWAITERS & LIFTS?

Matot has been helping people move materials and goods of any size, shape and weight since 1888.

Utilized within residential properties and a multitude of industries and environments, Matot products enable you to move practically anything up and down with ease, efficiency, safety and reliability. From carrying dirty dishes in a restaurant, to transporting monkeys in a zoo, to a sterile clean room in a micro-chip manufacturing plant, we can move whatever you have in mind.

Our success is reliant on the most advanced technology available today. Our skilled and experienced team is committed to creating highly functional dumbwaiters, material lifts and VRC's for your specific needs. Matot dumbwaiters are the most requested and trusted in North America. We follow all applicable codes and will expertly guide you through the process of selecting the best solution for your vertical transportation needs.

MATOT INTRODUCES "SMART DOOR" TECHNOLOGY

Matot is proud to launch the industry's first individual power door operator system for commercial dumbwaiter and material lift products. Leading edge technology built upon decades of power door experience will provide added reliability and performance for our customers.

- Hi-tech, reliable design features individual operator for each hoistway door and car gate
- Factory adjusted operators lift doors from both sides for stable operation
- Variable speed motor controllers provide smooth operation and precise control
- Individual motors improve reliability, installation and alignment issues
- Tolerant of hoistway imperfections
- Networked CAN-Bus control option for Matot "Smart Door" operation
- Simplified wiring

Linear actuators and compact gear motors are designed for 100% duty cycle at full capacity. Efficient system packaging allows for power door option in most hoistways.
